

Arash Esnaashari

18 y/o Front-end Developer

 919 800 3528

 Tehran

Education

Kharazmi University
Computer Science 2022

Alborz High School
Math and Physics 2019

Skills

JavaScript

React

Design

Relative to Front-end

I have a good understanding on

Soft Skills

- Although I had not decided to land a job, in these 4 years I have had several good experiences communicating with people while I was working as a developer.
- As I have an ESTJ personality it is so important for me to do the job soon and in the best way I can and by that, I consider myself a responsible person.
- Beside Front-end development as I'm so passionate about learning new technologies and facing new challenges, I spent these 4 years learning Back-end Development and DevOps by studying online with YouTube and documentation.
- The reason I'm applying for this job is to gain experience working as an employee in the workspace and develop myself.

Projects

Bookgram

Blog + Ecommerce where you can read and share your idea about books

Social Media

Social Media for sharing gradient design

Friends Chat

a place where friends can chat and video call, I'm currently working on it

fake blockchain

just a challenge with TypeScript and contextApi to mock the blockchain functionality
